Glossary

Online Asynchronous. This is a virtual and remote format. The student is expected to complete assigned tasks through Blackboard. Asynchronous learning allows you to learn on your own schedule, within a certain timeframe. You can access and complete lectures, readings, homework and other learning materials at any time.

Online Synchronous: Synchronous learning means that although you will be learning from a distance, you will virtually attend a class sessions as scheduled, at the same time as your instructor and classmates. The class is a firm, time commitment that cannot be rescheduled. Much like an on-campus, in person class, you will have readings and assignments to complete outside of class time to help prepare you to participate in the discussion.

In Person: Face to face classes at QLU. The student is expected to come in person to QLU for class.
